

Post appointment instructions

Fillings

1. Avoid chewing or eating until the local anesthetic has worn off.
2. Sensitivity to extremes in temperature or chewing is not uncommon following the placement of a filling. This sensitivity will usually pass in a week or so.
3. Take Advil or Tylenol to alleviate these symptoms if they occur.
4. If when you close your mouth, it feels like you are hitting first or harder on the teeth we placed fillings in, please call us so we can have you come in and adjust them. This is a quick and easy procedure.
5. If you have any questions, please do not hesitate to call us at **423-7868**
